

Participate in food recalls (accredited)

Program Outline	<p>This program is for HACCP team leaders, quality assurance personnel who implement and monitor a workplace food safety program. It will assist those responsible for initiating and conducting a product recall on behalf of their food manufacturing operation, or food business. Effective product recall procedures are an essential component of a food safety system, based on the principles and application of HACCP Codex. This program meets the requirements of NSW Food Authority, WSEP, SQF, CGL, and other food safety system requirements.</p>
Program Outcomes	<p>This ONE day training program will provide you with information to manage the risk and implications for your business, by being well prepared for a recall situation.</p> <p>On completion of this program, you will be able to:</p> <ul style="list-style-type: none"> • Identify criteria and circumstances for a product recall • Identify legal responsibilities and vendor customer requirements • Identify controls designed to prevent product recall • Identify features of the workplace product recall system and procedures • Implement timely and effective recall procedures • Investigate contributing causes of the product recall • Establish mechanisms to improve operations and minimise the risk of occurrence
Program Content	<p>“Participate in product recalls” is an accredited unit of competence – FBPTEC4008</p> <p>This course will cover:</p> <ul style="list-style-type: none"> • Circumstances and criteria that could result in a product recall • Legal responsibilities and implications of a food product recall • Requirements of vendor customer standards for recall management • Features and phases of a product recall • Effective product recall systems and procedures • Communication plan for major stakeholders including authorities, vendors and consumers. • Decision making, investigation and risk management processes required in a recall • Controls and mechanisms for continuous improvement and risk minimisation
Delivery Guide	<p>Students will complete some initial prereading before content is delivered in a one day training workshop.</p> <p>Students complete a range of assessment tasks in class and work based projects, including an individual workbook with short questions and answers, guided case study in class then complete a workplace mock recall with all reports and records. A supervisor report will be required to validate your food safety responsibilities and completion of a workplace mock recall.</p> <p>The trainer will incorporate practical hints and tips, model templates and forms, sharing knowledge of actual recall events and best practice recall management.</p> <p>The successful completion of the program, and the associated assessments, will result in the awarding of a Statement of Attainment for the unit of competence FBPTEC4008 Participate in product recalls. This program may contribute to FBP40421 Certificate IV in Food Science and Technology.</p> <p>Alternatively, students may opt for a Certificate of Participation for attending the program.</p>
